

## 4. Consultation with Interested Persons

An initial contact list of interested persons was developed prior to the initiation of the EA process and during preparation of the ToR. Since the ToR has been approved (with amendments) and the start of the EA / IA, this list continues to evolve as the Project progresses. Interested persons are individuals and groups that could have an interest in the Project, including but not limited to Indigenous Peoples, communities / residents in the region, recreational users or those with recreational interest (e.g., hikers, campers, hunters, and environmental groups), and those with commercial interests (e.g., forestry, trappers, outfitters, and mineral claim and tenure holders in the area).

The following section provides an overview of consultation and engagement with interested persons that has occurred during the period between submission of the ToR and the Minister's approval with amendments of the ToR (August 1, 2020 to October 28, 2021). In addition, this section provides a summary of specific inquiries, feedback received, and issues raised by interested persons, MFFN CAR Project Team's response or action, and how it was addressed in the ToR or how it will be considered in the EA / IS. In Appendix A and C of this report, monthly E-Blasts and Field Notices circulated to interested persons are provided (Appendix A includes materials sent to interested persons and others, while Appendix C includes materials specific to interested persons).

## 4.1 Key Consultation and Engagement Activities

Date	Consultation and Engagement Activity
Oct 23, 2020	Distribution of Notification of Submission of ToR to MECP via email including the Notice of Submission, a Memo from MECP, Acknowledgment of Receipt of ToR Form and electronic links to ToR documents.
Oct 29, 2020	Twin Lakes provided comments on the ToR to MECP.
Dec 19, 2020	Leuenberger Air provided comments on the ToR to MECP.
Dec 21, 2020	Noront Resources provided comments on the ToR to MECP.
Dec 21, 2020	Wildlife Conservation Society provided comments on the ToR to MECP.
Feb 08, 2022	MECP provided ToR comment responses to Twin Lakes, Leuenberger Air, Noront Resources and Wildlife Conservation Society.
Apr 09, 2021	April 2021 MFFN CAR Newsletter distributed via email.
May 11, 2021	May 2021 MFFN CAR E-Blast distributed via email.
June 23, 2021	June 2021 MFFN CAR E-Blast distributed via email.
Jul 30, 2021	July 2021 MFFN CAR E-Blast distributed via email.
Aug 26, 2021	August 2021 MFFN CAR E-Blast distributed via email.
Sep 13, 2021	Distribution of Surface Water, Fish and Fish Habitat educational video.
Sep 20, 2021	Distribution of Vegetation educational video.
Oct 01, 2021	September 2021 MFFN CAR E-Blast distributed via email.

## 4.2 Summary of Feedback Received and Response / Action

Item #	Topic / Issue Raised	Specific Issue / Comment Raised	Communication Channel	Response / Action	Addressed in the ToR / Consideration in the EA / IA
1.	<ul style="list-style-type: none"> <li>Field Studies</li> <li>Surface water</li> <li>Groundwater</li> <li>Monitoring</li> </ul>	<b>Issue—Metal monitoring:</b> Received an inquiry on December 10, 2019 whether field studies and water monitoring will sample for mercury or other metals such as chromium	<ul style="list-style-type: none"> <li>Email</li> </ul>	<ul style="list-style-type: none"> <li>Status: Complete</li> <li>On August 27, 2020 the MFFN CAR Project Team offered to provide relevant contact information for sources for existing information from the provincial government and Noront upon request. Existing information on surface water (and groundwater) quality, if available, will be summarized in the EA as part of the characterization of baseline conditions</li> <li>The MFFN CAR Project Team submitted a Surface Water Study Plan, and a Groundwater and Geochemistry Study Plans in May of 2021 to regulatory</li> </ul>	<ul style="list-style-type: none"> <li>Information on the assessment of surface water and groundwater is found in Section 7.2 of the ToR</li> <li>The EA / IA will continue to assess surface water and groundwater and information will be provided in the draft EA / IS.</li> </ul>

Item #	Topic / Issue Raised	Specific Issue / Comment Raised	Communication Channel	Response / Action	Addressed in the ToR / Consideration in the EA / IA
				agencies. A Groundwater and Geochemistry Work Plan was submitted for review by regulatory agencies in August 2021.	
2.	■ Procurement	■ <b>Issue—Service Providers:</b> Inquiry received on October 29, 2020 regarding the hiring of dump trucks on the Project and offering various services.	■ Email	■ Status: Complete ■ The MFFN CAR Project Team responded on January 7, 2021 that the Project is still in the planning phase and further information on Project timelines were provided.	■ N/A
3.	■ EA process	■ <b>Issue—ToR Comments:</b> Twin Lakes provided one comment on the ToR to MECP.	■ Email	■ MECP provided ToR response comments on February 8, 2021	■ N/A
4.	■ EA process	■ <b>Issue—ToR Comments:</b> Leuenberger Air provided two comments on the ToR to MECP.	■ Email	■ MECP provided ToR response comments on February 8, 2021	■ N/A
5.	■ EA process	■ <b>Issue—ToR Comments:</b> Noront Resources provided seven comments on the ToR to MECP.	■ Email	■ MECP provided ToR response comments on February 8, 2021	■ N/A
6.	■ EA process	■ <b>Issue—ToR Comments:</b> Wildlife Conservation Society provided 67 comments on the ToR to MECP.	■ Email	■ MECP provided ToR response comments on February 8, 2021	■ N/A
7.	■ Route Alternatives ■ Recreation and Tourism	■ <b>Issue—Route Selection:</b> Received a phone call on January 5, 2021 from an individual with interest in purchasing an Outpost Camp but wanted to know how the outpost camp could be impacted if Route Alternative 4 was selected as the preferred route alternative.	■ Phone	■ Status: Complete ■ The MFFN CAR Project Team responded on January 11, 2021 providing information on the current phase of the Project and how the process will assess potential effected to tourism operators.	■ The alternative routes to be considered in the EA, and the rationale for each, were described in Section 6.3 of the ToR and depicted in Figure 6-1. Additional information was also provided in the Alternative Development document provided with the ToR. ■ The EA / IA will continue to identify the overall advantages and disadvantages of the preferred route, as reference in Section 8 of the ToR, and additional information will be provided in the draft EA/IS.
8.	■ Procurement	■ <b>Issue—Service providers:</b> Received an inquiry on March 30, 2021 whether there were any tenders open for the Project.	■ Email	■ Status: Complete ■ On April 13, 2021 the MFFN CAR Project Team responded, informing that the Project is still in the planning phase and further information on Project timelines were provided.	■ N/A

Item #	Topic / Issue Raised	Specific Issue / Comment Raised	Communication Channel	Response / Action	Addressed in the ToR / Consideration in the EA / IA
9.	■ Indigenous Knowledge and Land Use	■ <b>Issue—IK Sharing Agreements:</b> Inquiry on May 6, 2021 regarding the process, participation and guidance for the IK Sharing Agreements for the Project.	■ Email	<ul style="list-style-type: none"> <li>■ Status: Complete</li> <li>■ The MFFN CAR Project Team responded on May 27, 2021 noting existing and relevant IK and Indigenous land and resource use information previously collected by communities, the completion of project-specific IK and Indigenous land and resource use studies will inform the IK studies. The IK Sharing Agreement outlines how the sensitive and confidential data will be protected. Six guiding principles were used to develop the IK Program.</li> </ul>	<ul style="list-style-type: none"> <li>■ Section 3.4 of the ToR provided information on how IK will be incorporated into the EA process. Section 7.1 discusses how Indigenous land use information will be considered in the Stage 1 archaeological assessment for the Project.</li> <li>■ The EA / IA will include information collected from the IK Program and will be reflected in the draft EA/IS.</li> </ul>
10.	■ Wildlife	■ <b>Issue—Spawning Habitat:</b> Received an inquiry on June 24, 2021 regarding what will be done about issues of crossing the Dusey River in Brook Trout spawning habitat near Dusey Lake.	■ Email	<ul style="list-style-type: none"> <li>■ Status: Complete</li> <li>■ On November 23, 2021 the MFFN CAR Project Team asked 7 Lakes Wilderness for general spawning locations so that a zoomed in map could be provided to identify specific areas. This request has not yet been responded to.</li> <li>■ On July 22, 2022 the MFFN CAR Project Team informed that field studies will include a program studying fish and fish habitat, more information on this program including preliminary results. The response also noted that based on the results of the fish and fish habitat assessment completed for the Project on September 8, 2019, it is acknowledged that there is potential spawning habitat for Brook Trout at the Dusey River crossing. The Dusey River was surveyed 100 m upstream and 200 m downstream of the proposed crossing. The crossing was in flat habitat with mixed substrates of cobble, gravel, boulder, sand and silt. In addition to the spawning habitat, the surveyed section has moderate to high overwintering potential for most fish species as average water depths were greater than 1 m. Rearing habitat (i.e., areas where larval</li> </ul>	<ul style="list-style-type: none"> <li>■ Fish and fish habitat are discussed in Section 7.1 (baseline conditions) and 7.2 (potential effects) of the ToR.</li> <li>■ The EA / IA will continue to assess fish and fish habitat information, and this will be reflected in the draft EA / IS.</li> </ul>

Item #	Topic / Issue Raised	Specific Issue / Comment Raised	Communication Channel	Response / Action	Addressed in the ToR / Consideration in the EA / IA
				<p>and juvenile fish find food and shelter) was rated as moderate for large bodied species such as Walleye and Brook Trout and for small bodied species such as Brook Stickleback. Potential rearing and spawning habitat for Northern Pike was low due to limited aquatic vegetation. The mix of coarse substrates provides moderate potential spawning habitat for large bodied fish (e.g., Walleye, White Sucker and Brook Trout). Fish sampling in the Dusey River was also conducted for the Project in 2019 and for the Cliffs Chromite Project in 2012. No fish were captured in 2019; however, one Yellow Perch and two unidentified darters were observed. Brook Trout, Yellow Perch, Longnose Sucker, White Sucker, Shorthead Redhorse, Pearl Dace, Common Shiner and Blacknose Shiner were captured during the 2012 Cliffs Chromite Project fish sampling program.</p> <ul style="list-style-type: none"> <li>■ The response also noted that the EA will also assess potential effects of the alternative routes on fish and fish habitat by evaluating potential effects to fish habitat quantity and quality, use and access to habitat and migration, and survival, reproduction and abundance. This includes assessing potential effects from placing crossing structures on waterbodies and potential effects from changing public access to recreational angling areas. Any such effects will be identified in the EA.</li> <li>■ The response also noted that the Project's goal is to design measures and mitigation strategies to maintain existing environmental conditions to the extent possible with any potential effects being minimized or avoided altogether. Critical</li> </ul>	

Item #	Topic / Issue Raised	Specific Issue / Comment Raised	Communication Channel	Response / Action	Addressed in the ToR / Consideration in the EA / IA
				environmental receptors, or resources such as the Brook Trout fishery on the Dusey River would be aligned and held to this same benchmark in Project planning and implementation.	
11.	■ Economy	■ <b>Issue—Affected Businesses:</b> Received an inquiry on June 24, 2021 whether the Project will purchase businesses affected by the Project.	■ Email	■ Status: Complete ■ On July 22, 2022 the MFFN CAR Project Team informed that the EA will assess potential effects of the alternative routes on tourism operators by evaluating predicted changes on the basis of the 'Recreation and Tourism' valued component. As well, as part of the assessment, mitigation will be recommended to avoid and / or minimize the predicted effects. This could include measures to minimize effects that could disturb operations of existing tourism outfitters, or as part of design development of alternative route alignments and watercourse crossing locations.	■ Section 7.1 of the ToR included existing environmental and potential environmental effects, specifically on social, economic and built environments. ■ The EA / IA will assess potential effects of the alternative routes on tourism operators and information will be provided in the draft EA / IS.
12.	■ Treaty Territory ■ Cultural Heritage ■ Aboriginal and Treaty Rights ■	■ <b>Issue—Territory:</b> On December 2, 2020 it was noted that the Project is located on Treaty 9 Territory, consideration is needed regarding heritage, hereditary and traditional lands.	■ Email	■ Status: Complete ■ A response was sent January 7, 2022 noting that the EA will look at how Cultural Heritage and Aboriginal and Treaty Rights and Interests may be affected by the proposed road.	■ Section 7.1 of the ToR included existing environmental and potential environmental effects, specifically on cultural heritage and Aboriginal and Treaty Rights and Interests. ■ The EA / IA will look at how Cultural Heritage and ATRI may be affected by the proposed road and will be reflected in the draft EA / IS.
13.	■ Mitigation, Compensation, Accommodation ■ Lands, territory and Title ■	■ <b>Issue—Revenue:</b> Received a request on December 2, 2020 to see revenue sharing within the Traditional Lands.	■ Email	■ Status: Complete ■ A response was sent January 7, 2022 noting that the Project is currently in an earlier planning phase of the EA, therefore details like revenue sharing is not part of the current stage of work.	■ N/A

Item #	Topic / Issue Raised	Specific Issue / Comment Raised	Communication Channel	Response / Action	Addressed in the ToR / Consideration in the EA / IA
14.	<ul style="list-style-type: none"> <li>■ Land and Resource Use</li> <li>■ Provincial Government Involvement</li> </ul>	<ul style="list-style-type: none"> <li>■ <b>Issue—Land Use Agreement:</b> Inquiry on December 2, 2020 whether there is a Land Use Agreement between MFFN, Ontario and Noront resources.</li> </ul>	<ul style="list-style-type: none"> <li>■ Email</li> </ul>	<ul style="list-style-type: none"> <li>■ Status: Complete</li> <li>■ A response was sent January 7, 2022 noting that a Land Use Agreement has not been developed. At the time of this response, the Project was in the ToR phase of the EA process. As this is an earlier planning phase, specifics like land use agreements or road ownership have not yet been determined. Conversations with the province are ongoing and any updates around road ownership will be provided as they are available.</li> </ul>	<ul style="list-style-type: none"> <li>■ N/A</li> </ul>
15.	<ul style="list-style-type: none"> <li>■ Consultation Methods</li> <li>■ Aboriginal and Treaty Rights</li> <li>■ EA process</li> </ul>	<ul style="list-style-type: none"> <li>■ <b>Feedback—Consultation Methods:</b> Received a document on December 2, 2020 regarding provincial relationships with First Nations following the advent of UNDRIP.</li> </ul>	<ul style="list-style-type: none"> <li>■ Email</li> </ul>	<ul style="list-style-type: none"> <li>■ Status: Complete</li> <li>■ On January 7, 2022 the MFFN CAR Project Team provided a response noting the Guidance document provided is outside the scope of the Project but was provided to MFFN. Further information was provided regarding the Duty to Consult and the 22 First Nations identified by MECP to be consulted based on constitutionally protected Aboriginal or Treaty Right that may be affected by the Project.</li> </ul>	<ul style="list-style-type: none"> <li>■ Section 10 of the ToR references the Duty to Consult.</li> <li>■ The draft EA / IS will include information on consultation and Duty to Consult.</li> </ul>

Brad Slagel also asked whether businesses affected by the Project will be bought out. Brad Slagel noted that brook trout fishing and moose hunting may be damaged or eliminated in some areas.
7 Lakes Wilderness Camps	■ Jul 22, 2021	■ Email – outgoing	■ Brad Slagel	■ Owner	■ MFFN CAR Project Team	■ The MFFN CAR Project Team provided more information to Brad Slagel about the results of the fish and fish habitat field work completed along the Dusey River crossing and information about how tourism outfitters and impacts to tourism will be considered as part of the EA / IA.
7 Lakes Wilderness Camps	■ Jul 29, 2021	■ Email – Incoming	■ Brad Slagel	■ Owner	■ MFFN CAR Project Team	■ Brad Slagel noted that the Brook Trout spawning ground concerns were previously raised at an open house meeting in Thunder Bay in 2019 and the MFFN CAR Project Team expressed interest and concern, noting they could consider changing the crossing. Brad Slagel also noted concerns that wilderness trips will no longer be marketable with the CAR, particularly for moose hunting and fishing. It was also noted that businesses will be financially compensated for the loss of revenue due to the construction of the CAR. A meeting would be welcome to discuss the topic further.
