The MECP noted that exceptions can be made based on what makes the most sense for the situation and are willing to work with the MFFN CAR Project Team to avoid duplicating emails to communities and causing confusion. The MECP asked if the communities listed previously had already been provided with responses to their comments and, if so, for the comment tables to be revised to indicated that the responses were previously provided. If the NeskFN-1 comment response had not yet been provided to Neskantaga First Nation then it could remain in the Neskantaga First Nation ToR comment response table. The MECP noted that the next step would be for the MECP to issue the Proponent's responses as PDFs to the relevant communities the following week and send copies of the emails to the MFFN CAR Project Team for records. The MECP asked for clarification that the link provided yesterday included comment responses for all the communities that provided comments on the ToR.
