<p>Traplines, Land and Resource Use, Aboriginal and Treaty Rights, Indigenous Knowledge and Land Use</p>	<p>Traplines</p> <ul style="list-style-type: none"> On February 8-9, 2023, at the ATRI Forum in Thunder Bay, the importance of the trapline system in the area was noted and will require additional discussions with community members. 	<ul style="list-style-type: none"> In-person 	<ul style="list-style-type: none"> The comment was noted by the MFFN CAR Project Team. Webequie First Nation was provided with opportunities to participate and share input during the Assessment Process. These opportunities included contributing Indigenous Knowledge, attending a meeting focused on the community-specific Milestone #1, #2 and #3 and reviewing key documents such as the Archaeology Stage 1 and 2 Reports. The community was also invited to engage through both Three Road Projects Gathering and Expo (June 11 to 13, 2024, and February 19 to 20, 2025,) and Public Information Centres (October 25 to 26, 2024, and May 26 to 29, 2025). These events were intended to facilitate dialogue and provide space for feedback. On February 19, 2025, the MFFN CAR Project Team shared the Draft EA / IS with Webequie First Nation which included information on traplines in the Project Study Area. Webequie First Nation had until June 23, 2025, to review and provide feedback. On July 10, 2025, the community-specific ATRI: Draft IA Report was distributed to Webequie First Nation. No feedback was received. As of September 5, 2025, no comments were received on the Draft EA / IS by Webequie First Nation. During the Assessment Process, the Ontario Ministry of Natural Resources contacted trapline holders within the Construction Disturbance Area via letter to request consultation regarding existing conditions. While the Project’s consultation and engagement activities with interested persons may have included trapline holders, the trapline maps and contact information are considered confidential. 	<ul style="list-style-type: none"> Changes were made to the Draft Preliminary ATRI Existing Conditions Report for the EA / IS, which included an increase to the size of the Local Study Area from a 5 kilometre to a 10- kilometre buffer. Changes were also made to the Regional Study Area, increasing its size to more than double the original area. In addition, based on feedback received from Indigenous communities and groups regarding the potential for the Project to affect Aboriginal and/or Treaty Rights and Interests beyond the Regional Study Area, and considering the ranges and movements of caribou, a Caribou Regional Study Area was established Additional information on Trapping and Traplines in the Project Study Area can be found in the Final EA / IS in Section 8.3.6, Section 8.3.9, and Figure 8.3-17. Additionally, Appendix U includes information on trapping in Section 5.1.6 and Figure 5-2.
